# PROBLEM STATEMENT

Researchers, students, and professionals often struggle to stay updated with the rapidly growing volume of academic publications, technical articles, datasets, and evolving research trends. Manually reviewing, filtering, and synthesizing information across multiple domains is time-consuming and inefficient.

Proposed Solution:

An AI Research Agent that uses Natural Language Processing (NLP), Retrieval-Augmented Generation (RAG), to assist users in conducting efficient literature reviews, generating summaries, identifying research gaps, and recommending relevant papers, datasets, or collaborators.

---

# TECHNOLOGY USED

IBM cloud lite services

Natural Language Processing (NLP)

Retrieval Augmented Generation (RAG)

IBM Granite model

# IBM CLOUD SERVICES USED

- IBM Cloud Watsonx AI Studio
- IBM Cloud Watsonx AI runtime
- IBM Cloud Agent Lab
- IBM Granite foundation model

# WOW FACTORS

This agent will significantly reduce research time, improve the quality of literature reviews, help early-stage researchers find direction, and foster interdisciplinary collaboration by making knowledge more accessible and actionable.

Unique features:

Semantic search across research papers, journals, and datasets

Auto-summarization of selected papers

Citation and reference analysis to trace influence

Recommendation of research papers based on a user's current topic

Trend analysis over time for specific keywords or domains.

Collaboration mapping: suggests potential co-authors or institutions based on similar research interests.

---

## END USERS

- Academic Researchers
- Research Institutions and Universities
- Industry R&D Teams
- Educators

## Agent preview

You: 11:22 AM

show me recent research on artificial intelligence

TRAVEL AGENT 11:22 AM

Here are some recent research articles and news on artificial intelligence:

1. **MIT News:** In a new study, researchers discover the root cause of a type of bias in LLMs, paving the way for more accurate and reliable AI systems. [Read more](#)
2. **arXiv:** Harnessing AI Agents to Advance Research on Refugee Child Mental Health. [Read more](#)
3. **Stanford HAI:** News on how artificial intelligence improves patient care and expands research capacity. [Read more](#)
4. **Journal of Artificial Intelligence Research:** Current Issue on machine learning, natural language, planning and scheduling, robotics and vision, and uncertainty in AI. [Read more](#)
5. **ScienceDaily:** A team of researchers has shown that even small-scale quantum computers can enhance machine learning performance. [Read more](#)
6. **McKinsey:** The latest McKinsey Global Survey on AI finds that organizations are beginning to take steps that drive bottom-line impact. [Read more](#)
7. **Apple Machine Learning Research:** Overview of the latest advancements in machine learning and artificial intelligence. [Read more](#)

## Deployed AI Agent

The screenshot displays the IBM Watsonx user interface. At the top, a navigation bar includes the 'IBM watsonx' logo, an 'Upgrade' button, a help icon, a notification bell, and user information for 'Ayush Sharma's Account' in 'London'. Below this, a breadcrumb trail shows 'Deployment spaces / Hosted / Research Agent'. The main section is titled 'Research Agent' with a green 'Deployed' status and an 'Online' indicator. Three tabs are visible: 'API reference', 'Test', and 'Preview', with the 'Preview' tab selected. The chat interface shows a conversation where a user asks for a hypothesis about plants and sunlight, and the 'TRAVEL AGENT' responds with two hypotheses and their sources. The chat input field at the bottom contains the placeholder text 'Type something...'. A 'New chat +' button is located in the top right corner of the chat area.

AS You: 11:29 AM  
Give me a simple hypothesis about plants and sunlight

TRAVEL AGENT 11:29 AM  
Here are some simple hypotheses about plants and sunlight:

1. Hypothesis: Plants grow taller when they receive more sunlight.
  - Independent Variable: Amount of sunlight received.
  - Dependent Variable: Height of the plants.
  - Source: [Brainly](#)
2. Hypothesis: Light helps plants grow.
  - Prediction: If I put my plants in the warm sun, they will grow faster.
  - Source: [LinkedIn - Lukas Vermeer](#)
3. Hypothesis: If plants receive more sunlight, then they will be taller than those receiving less light.

---

## CONCLUSION

- The agent can generate reports, suggest hypotheses, and even draft sections of research papers.
- It saves time by automating repetitive tasks like citation management and data extraction.
- Research Agents enhance efficiency, accuracy, and innovation in both academic and industrial R&D.

---

# FUTURE SCOPE

- Multilingual Research Support
- Voice-Activated Research Assistant
- Real-Time Collaboration Features
- Research Gap and Novel Topic Identification
- Integration with Publishing Platforms
- AI-Assisted Paper Drafting
